Education

Institution	Course	Grade	Duration
Dayananda Sagar College Of Engineering, Bangalore	B.Tech (CSD)	CGPA: 9.5	2024-2028
Shiv Ashish World School, Gujarat	Class 12th	67.0%	2023 - 2024
Sri Venkateshwar International School, Delhi	Class 10th	89.0%	2021 - 2022

Skills Summary

- **Technical Skills**: Java, C, C++, HTML, CSS, Python Learning, JavaScript, React, Next.js
- **Software Tools**: Git, Figma, Sketch, Canva, Adobe Photoshop, Adobe Premiere Pro, GitHub
- **Design Skills**: UI/UX Design, Visual Design, Interaction Design, User Flows, Wireframing, Prototyping, Responsive Design, Micro-interactions, Component-based UI Systems
- **Design Process**: Research, Define, Ideate, Wireframe, Design, Prototype, Develop, Refine
- **Interests**: Creative Web Design, Frontend Development, Digital Experiences, Video Editing

Projects

- **PlayDay Sports App – UI/UX Design (Figma, Adobe Photoshop) | 2024**: Prototype
  - Designed an end-to-end mobile app for sports venue discovery, player matchmaking, scheduling, and booking.
  - Designed key flows including splash, sign in/register, home dashboard, matchmaking, athlete profile, discovery and search, and venue details.
  - Created booking and scheduling flows for cricket, football, pickleball, and badminton, ending in a booking confirmation with a QR code for venue entry.
  - Built a dark, premium interface with neon lime accents, a sports-focused visual language, and a consistent UI system across every sport.
- **Swiggy Food Delivery Mobile App – UI/UX Design (Figma)**: Prototype
  - Designed a complete mobile app UI including login, home screen, and food category pages.
  - Created smooth animations and transitions such as splash screen flow and tab navigation to improve user experience.
  - Followed modern design patterns inspired by Swiggy and Zomato to maintain usability and visual consistency.
  - Organized components using Auto Layout and reusable styles to keep the design clean and scalable.
  - Paid attention to spacing, typography, and color balance to create a visually pleasing interface.
  - Reworked the login experience for clearer visual hierarchy, responsive layouts, and better interface feedback through micro-interactions.
- **Personal Portfolio Website**: parthsahniportfolio.vercel.app
  - Built a responsive personal portfolio website to showcase projects, skills, and design work.
  - Implemented smooth scrolling, clear section navigation, and a clean layout for better user experience.
  - Managed source code using Git and GitHub, and deployed the website using Vercel.
  - Fixed image path issues and optimized assets to ensure proper display on live deployment.
  - Integrated social media links and project sections to create a professional online presence.
  - Built with Next.js and React, with a dedicated case-study page for each project covering its goal, scope, key features, and Figma prototype.
- **"Lowkeyy" Clothing Brand App – UI/UX Design (Figma, Adobe Photoshop)**:
  - Designed a modern Gen-Z fashion app with a dark, minimal, and premium visual style.
  - Created brand identity elements including logo concept, typography, and color system.
  - Designed product screens, banners, and layouts inspired by luxury streetwear brands.
  - Maintained clean spacing, visual hierarchy, and consistency to improve readability and aesthetics.
  - Used Figma components, Auto Layout, and prototyping to keep the design scalable and organized.
  - Built interactive screens to simulate real app flow and smooth user navigation.

- **Monster Energy Drink Website – Visual + Web Design (Concept)**: Prototype
  - Self-initiated concept website exploring an immersive, Monster Energy inspired digital experience (not an official or client project).
  - Created a dark, high-contrast visual direction with bold typography, strong visual compositions, and a sport and performance language.
  - Designed and prototyped an interactive web experience in Figma.
- **NestMates Website – UI/UX + Web Design**: Prototype
  - Designed the website and user interface for NestMates, built around the idea of "Find your people."
  - Created an interactive Figma prototype of the website experience.

Extra-Curriculars and Other Projects

- Completed Arduino Training – Level 1, Level 2, and Level 3, gaining hands-on experience in basic electronics, sensors, and microcontroller programming.
- Won 1st Place in a Robotics Competition (Class 6) and received a prize worth 20,000 for building an innovative robotics project.
- Actively participated in organizing and conducting college fest events, managing coordination, teamwork, and on-ground execution.
- Developed strong problem-solving skills, technical curiosity, leadership, and collaboration through practical activities.
